 Cellar Door
STUDIOS

We are not real-estate moguls putting our lands to the in-trend use.
In simple words, the studios by Cellar Door are spaces designed, built and operated by creators for creators.
And today, we are the largest and (if we may say so ourselves) the most loved chain of studios in Delhi NCR.

Our studios are as plug-n-play as they can be and yet super customizable. The aesthetics are designed to be a mix of what is in, was in and will be in, so that the spaces and the creations stand the test of time. Most of our studios are even equipped with high-end gear so that redundancies, and hence costs, are minimized.

The dimensions and layouts are designed for no-compromise shoots. And it is all topped with creature comforts which will make you come back without thinking twice.

The image shows a 3D-rendered interior of a cube, entirely monochromatic in a vibrant orange color. The walls, floor, and ceiling are all made of vertical wooden planks. On the left and right walls, there are two oval-shaped windows each, with a smaller oval window in the center of each wall. These windows are brightly lit from within, creating a strong contrast with the orange surroundings. In the center of the back wall, there is a small, rectangular pedestal or table. The overall aesthetic is clean, modern, and minimalist.

POP

A monocholor cube with five windows.
And infinite moods.
The lights behind the windows shift the whole vibe.
From orange to blue to alien green.
Just with a remote.
It's clean, stylized, and made for reels,
product drops, and thumb-stoppers.

A woman with long dark hair, wearing a white crop top with 'NEW YORK' text, a blue skirt, and fishnet stockings, stands in a tunnel with graffiti-covered walls. She is holding a basketball in her right hand. The word 'GRUNGE' is overlaid in large, stylized, multi-colored letters.

GRUNGE

GRUNGE

Grunge is chaos with history.
It's modeled on a London subway.
Layers of graffiti.
Some pro, some raw, some glowing under UV light.
And yeah — we've got blacklight built in.
Or switch to our five app-controlled smart tubes
to set the mood your way.

PROJECTION SETUP

This is Delhi NCR's first high-end projection setup available for hire. It has, not one, but two 200" high-quality screens — a high-gain white, an ALR gray — for bright or high-contrast backdrops. A 4K-compatible Optoma laser projector throwing 6400 lumens. It's short throw — so your subject can stand just five feet from the screen without blocking it.
